Summary

I'm a passionate 3rd year Computer Science student from VIT Vellore. I am a person with diverse interests, always on the lookout to learn new things and make myself more proficient in these fields. Competitive coding, Artificial Intelligence and Machine Learning are some of the fields that intrigue me. Having finished an ML course on Coursera was the start of my journey in Machine Learning, and having just recently completed an internship in ML, I have got my first real-world experience in this field.

Education

B.Tech in Computer Science | VIT Vellore | 09/ 2022 - 06/2026 | Vellore, Tamil Nadu

- Received a merit certificate for being the branch topper in my 1st year
- Received a merit certificate for being ranked 3rd in my 2nd year
- Current CGPA is 9.56 at the end of 2nd year

12th CBSE | Geetanjali Olympiad School | 06/ 2020 - 06/2022 | Bangalore, Karnataka

- Obtained 93% in 12th CBSE boards

10th ICSE | New Horizon Public School | 06/2020 | Bangalore, Karnataka

- Obtained 98% in 10th ICSE boards and was ranked 3rd in my school

Experience

Machine Learning Intern | 05/2024 - 07/2024 | Talent Recruit | Bangalore, Karnataka

I worked on building an RAG pipeline prototype for resume recommendation as well as developing a SpanCat pipeline for resume parsing which improved the efficiency of the existing system by more than 15%. The resume recommendation system helps employers find the most suitable candidate for a specific Job Description. I also worked on data labelling, data pre processing and visualization, which was helpful for the model training process

Projects

- **Road Sign Detection**
  In 2024: I developed a road-sign detection system using the YOLO model, in which I carried out the development and training of the model. Our idea and this implementation took us to the final pitching round for the top 10 teams in a hackathon
- **Customized Chatbot**
  In 2023:- Designed a website that would read PDF's/ Youtube videos/ general links and answer relevant questions besides giving a summary of it. We won "Best Fresher Award" in this hackathon.
- Designed a calculator app on Android Studio which performs all the basic operations
- Developed a Tic-Tac-Toe game from scratch using Java and its graphics.

Skills

- **Coding**: Python, Java, C++, Kotlin, HTML, CSS, MySQL, Kotlin, Flutter
- **Frameworks**: Tensorflow, Pytorch, Keras, Scikit Learn, Numpy, Pandas
- Well versed with the concepts and applications of data structures and algorithms
- **Certified** in Machine Learning by Stanford University & DeepLearning.AI on Coursera by completing all the 3 specialization courses
- Familiar with Sentence Transformer: Training processes, loss functions, and evaluators used
- Experienced in data pre-processing and data visualization

Volunteering Works

- **Juvenile Care NGO VIT | Senior Core Member |** March 2023 – Present

I am an active member of VIT NGO club, with a sincere attempt to make the lives of children better. We do this by conducting fun filled events in orphanages, cancer care centres.
